

Attorney Docket No. 021353-118.130

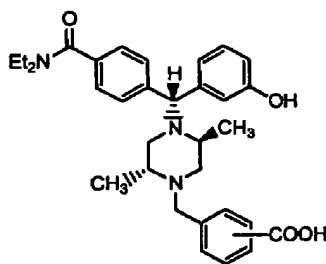

REMARKS

In the March 28, 2006 Office Action the Office imposed a restriction requirement on pending claim 1-40 as follows:

Group I, claim 1-7, 9-13, 15-19 and 29-30 drawn to a pharmaceutical composition; and
Group II, claims 8, 14, 20-28 and 31-40, drawn to a method of using said composition.

Applicants traverse this restriction requirement and elect Group II for further prosecution with the understanding that a divisional application can be filed to recapture product claims.

In addition, the Office requested that applicants elect a single disclosed species from the compositions. In response, applicants elect the composition comprising the compound having the following structure

4-((2R, 5S)-4-[(R)-(4-Diethylcarbamoylphenyl)(3-hydroxyphenyl)methyl]-2,5-dimethyl-1-piperazinylmethyl}benzoic acid.

The selected species is readable on generic claim 8, and species claims 14, 20-28 and 31-40. Applicants remind the Office that when the generic claim is found patentable then all species claims should be examined and found patentable. Further, when the method claims comprising the compositions of Formula I are found patentable a composition that includes an additional component should also be found patentable and included in a Notice of Allowance.

Supplemental IDS

Applicants have included a Supplemental Information Disclosure Statement for the review by the Office.
